

MATERIAL REMOVAL AND DISPENSING DEVICES, SYSTEMS, AND METHODS

ABSTRACT OF THE DISCLOSURE

5 [0119] The present invention provides material removal heads and devices for noninvasively removing materials from the wells of multi-well plates. The material removal heads of the invention are structured to prevent cross-contamination among wells of multi-well plates as materials are removed from the plates. The invention also provides dispense heads and devices that include angled dispensers.

10 Related systems, kits, and methods are additionally provided.
